## Objective

As a third-year IT student pursuing BTech, I am passionate about web development and possess a strong understanding of various web technologies. With a keen interest in AI and ML, I aim to leverage my skills and knowledge to contribute effectively to projects that blend the realms of web development and artificial intelligence, seeking opportunities for continuous learning and growth in these fields.

## Experience

- Aditya Birla Group** June - - July 2023  
Web Developer Intern  
I completed an internship as a Web Developer at Aditya Birla Group, where I gained hands-on experience in developing and maintaining web applications. Collaborating with a team of professionals, I contributed to the design, development, and testing phases of various projects. This internship provided me with valuable insights into industry best practices and enhanced my skills in HTML, CSS, JavaScript, and other web development technologies.
- Internshala** August - - September 2022  
Core Java  
I successfully completed a virtual internship in Core Java through Internshala. Throughout the program, I acquired a solid foundation in Java programming language, including key concepts such as object-oriented programming, data structures, and algorithms. Engaging in hands-on projects and assignments, I honed my coding skills and gained practical experience in developing Java-based applications.

## Education

- Noida Institute of Engineering and Technology** 2021 - 2025  
Bachelor Of Technology  
7.0
- Techno India Group Public School** 2021  
Intermediate  
75 %
- Techno India Group Public School** 2019  
High School  
84.5%

## Skills

- Python
- Java
- MySql
- Html
- Css
- JavaScript
- NodeJs

- ReactJs

## Projects

- **Guest House Management System**

I developed a comprehensive Guest House Management System as a web application, aimed at streamlining the process of managing guest accommodations. Utilizing my expertise in web development technologies, I created a user-friendly interface allowing administrators to efficiently manage bookings, guest information, room availability, and billing. The system also incorporated features such as user authentication, real-time updates, and reporting functionalities, enhancing the overall efficiency and effectiveness of guest house management operations.

- **Gifs downloader**

I designed and developed a dynamic website dedicated to downloading GIFs, showcasing my proficiency in web development. Leveraging HTML, CSS, JavaScript, and backend technologies, I created an intuitive user interface allowing visitors to browse, search, and download GIF files efficiently. Implementing responsive design principles, the website ensured seamless accessibility across various devices, enhancing user experience. This project not only demonstrated my technical skills but also highlighted my ability to deliver practical solutions through web development.
